

## **Randy Ward's Visit to BYU-Idaho**

Randy Ward from the HBLI visited our campus on Thursday and Friday, Nov. 11-12. We met with all of the Chemistry Dept. faculty plus some students, where Randy gave them an orientation session on using the SciFinder Scholar database.

He also gave me helpful information on collection development in the field of Chemistry, and he gave me a listing of significant reference works in Chemistry. We evaluated the Chemistry collection in our stacks and in the reference collection. We reviewed our electronic resources, including e-books.

Randy's visit was very helpful. I appreciate him taking the time to come up, review our collection, and provide training.
